Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Information Disclosure Statement

1. The examiner has considered the information disclosure statement (IDS) submitted on 9/30/04.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-35, 46 and 47 are rejected under 35 U.S.C. 102(b) as being anticipated by Nguyen et al. (4,695,933).

Nguyen et al. disclose a multiphase DC-DC series-resonant converter in Figs. 2-4, 8 and 9. An input for accepting the DC voltage (30, 44), the input having a first voltage input and a second voltage input, an output for outputting a converted DC voltage (V_{dc2}), the output having a first voltage output and a second voltage output, a high side circuit (20, 22) including a first primary winding (32) of a first transformer (33), inductor (L1) and an auxiliary section (Q1 to Q10), series resonant circuit (C1, L1 and 32), a rectifier circuit (D3-D6) having a first secondary winding (34) of the first transformer (33), the rectifier circuit connected between the first voltage output and the second voltage output, and an output capacitor (C6) connected between the first

voltage output and the second voltage output and across the rectifier circuit (D3-D6) and plurality of rectifier circuit (42-1 to 42-N).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 36-45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nguyen et al.

Nguyen et al. discloses the claimed invention except for the range of values. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the optimum range, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.
